IVWANANJI SILUNGWE

COMPUTER SCIENCE STUDENT | SOFTWARE DEVELOPER

Zambia | [Add professional email] | [Add phone number] | LinkedIn
GitHub: NovaWallet | MedQueue repository

PROFESSIONAL PROFILE

Computer Science student and aspiring software developer building practical applications across backend, mobile, and web development. Interested in reliable APIs, database-backed systems, clean application architecture, and useful digital products. Hands-on project work includes a Spring Boot wallet backend, a Flutter mobile application in progress, and a collaborative healthcare appointment-management system.

TECHNICAL SKILLS

Languages	Java, Dart, Python, TypeScript, SQL
Backend & APIs	Spring Boot, REST APIs
Mobile & Web	Flutter, React, Next.js
Data	PostgreSQL, relational database concepts, NumPy, Pandas
Tools & Practices	Git, GitHub, Docker, GitHub Actions, Linux/Ubuntu, testing and debugging

SELECTED PROJECTS

NovaWallet — Digital Wallet Application

github.com/ivwananjisilungwe/NovaWallet

- Developing a full-stack wallet application with a Spring Boot backend/API and a Flutter mobile frontend.
- Backend foundation includes JWT-based authentication and PostgreSQL integration; the Flutter client is under active development.
- Built and validated the Flutter foundation with a successful Linux build, clean Flutter analysis, five passing tests, and adaptive light/dark themes.

Technologies: Java, Spring Boot, REST APIs, PostgreSQL, Flutter, Dart, JWT

MedQueue — Healthcare Appointment Management

github.com/MedQueue-Team/MedQueue

- Collaborated on an Android and Spring Boot application intended to support patient appointment queues, doctor workflows, and administrative operations.
- Worked within a multi-technology codebase involving Java, Kotlin, Android, Spring Boot, PostgreSQL, and Room.

Technologies: Java, Kotlin, Android, Spring Boot, PostgreSQL, Room

EDUCATION

Bachelor’s degree in Computer Science — In progress

Mulungushi University | Expected completion: October 2027

PROFESSIONAL INTERESTS

Backend engineering, mobile application development, API design, database-driven systems, software quality, and applied AI/ML.
